Jr. National Young Leaders Conference

The Junior National Young Leaders Conference (JrNYLC) helps scholars develop and sharpen their leadership skills by examining the leaders of the past and empowering them to make a positive social impact in their community and the world.

Geared toward looking at leadership through a practical, everyday lens, Jr. NYLC incorporates a detailed examination of eight leadership traits and focuses on leaders in American history and social advocacy. Distinctive site experiences, hands-on exercises and workshops bring these concepts to life, while students work together to develop action plans that affect change within their homes and communities.
